API Reference

Binance Web3 API (1.0.0)

Cross-chain wallet, market, trading, transaction, and B402 payment APIs for the Binance Web3 API platform.

- `GET /api/v1/dex/market/supported/chain` — Get Supported Chains
- `POST /api/v1/dex/market/price` — Get Token Price
- `POST /api/v1/dex/market/price-info` — Get Token Trading Info
- `GET /api/v1/dex/market/candles` — Get Candles
- `GET /api/v1/dex/market/token/search` — Search Token
- `POST /api/v1/dex/market/token/basic-info` — Get Token Basic Info
- `GET /api/v1/dex/market/token/advanced-info` — Get Token Advanced Info
- `GET /api/v1/dex/market/token/hot-token` — Get Hot Token List
- `GET /api/v1/dex/market/token/holder` — Get Holders Ranking
- `GET /api/v1/dex/market/token/top-trader` — Get Top Traders
- `GET /api/v1/dex/market/token/top-liquidity` — Get Top Liquidity Pools
- `GET /api/v1/dex/market/trades` — Get Token Trades
- `GET /api/v1/dex/market/memepump/tokenDevInfo` — Get Token Dev Info
- `GET /api/v1/dex/market/portfolio/supported/chain` — Get Portfolio Supported Chains
- `GET /api/v1/dex/market/portfolio/overview` — Get Address Portfolio Overview
- `GET /api/v1/dex/market/portfolio/recent-pnl` — Get Address Recent PnL
- `GET /api/v1/dex/market/portfolio/token/latest-pnl` — Get Address PnL for Specific Token
- `GET /api/v1/dex/market/portfolio/dex-history` — Get DEX Trade History
- `GET /api/v1/dex/market/leaderboard/list` — Get Leaderboard
- `GET /api/v1/dex/market/address-tracker/trades` — Get Tracked Trades
- `GET /api/v1/dex/market/rwa/platforms` — Get RWA Token Issuance Platforms

- `GET /api/v1/dex/market/rwa/price` – Get RWA Token Price
- `GET /api/v1/dex/market/rwa/search` – Search RWA Token
- `GET /api/v1/dex/market/rwa/underlying-profile` – Get RWA Underlying Info
- `GET /api/v1/dex/market/rwa/tokens` – Get RWA Token List
- `GET /api/v1/dex/market/rwa/underlying-market` – Get RWA Underlying Market Data
- `GET /api/v1/dex/aggregator/supported/chain` – Get Aggregator Supported Chains
- `GET /api/v1/dex/aggregator/approve-transaction` – Get ERC-20 Approve Transaction
- `GET /api/v1/dex/aggregator/quote` – Get Aggregated Quote
- `GET /api/v1/dex/aggregator/swap` – Build Swap Transaction
- `GET /api/v1/dex/aggregator/quote-and-swap` – Quote and Build Swap Transaction (Flash API)
- `GET /api/v1/dex/aggregator/swap-instruction` – Build Solana Swap Instructions
- `GET /api/v1/dex/aggregator/history` – Get Transaction Status
- `POST /api/v1/dex/aggregator/order/submit` – Submit RFQ Order
- `GET /api/v1/dex/aggregator/order/{orderId}` – Get RFQ Order Status
- `GET /api/v1/dex/pre-transaction/supported/chain` – Get Transaction Supported Chains
- `GET /api/v1/dex/pre-transaction/gas-price` – Get Gas Price
- `GET /api/v1/dex/pre-transaction/block-height` – Get Latest Block Height
- `POST /api/v1/dex/pre-transaction/gas-limit` – Get Gas Limit
- `POST /api/v1/dex/pre-transaction/simulate` – Simulate Transactions
- `POST /api/v1/dex/pre-transaction/broadcast-transaction` – Broadcast Transactions
- `GET /api/v1/dex/post-transaction/orders` – Get Broadcast Orders
- `GET /api/v1/dex/balance/supported/chain` – Get Wallet Supported Chains
- `GET /api/v1/dex/balance/all-token-balances-by-address` – Get All Token Balances by Address
- `POST /api/v1/dex/balance/token-balances-by-address` – Get Token Balances by Address
- `GET /api/v1/dex/post-transaction/transactions-by-address` – Get Transactions by Address
- `GET /api/v1/dex/post-transaction/transaction-detail-by-txhash` – Get Transaction Detail by Hash
- `POST /api/v1/defi/data/position/list` – Get DeFi Positions
- `POST /api/v1/defi/data/protocol/list` – List DeFi Protocols
- `POST /api/v1/defi/data/protocol/detail` – Get Protocol Detail
- `POST /api/v1/defi/data/investment/list` – List DeFi Investments
- `POST /api/v1/defi/data/investment/detail` – Get Investment Detail
- `POST /api/v1/defi/transaction/deposit` – Build DeFi Deposit Transaction
- `POST /api/v1/defi/transaction/redeem` – Build DeFi Redeem Transaction
- `POST /api/v1/defi/transaction/lp-add` – Build LP Add Transaction
- `POST /api/v1/defi/transaction/lp-add/calculate` – Calculate LP Add Paired Amounts
- `POST /api/v1/defi/transaction/lp-remove` – Build LP Remove Transaction
- `POST /api/v1/defi/transaction/claim` – Build DeFi Claim Transaction
- `POST /api/v2/b402/supported` – Get B402 Supported Configurations V2
- `POST /api/v2/b402/verify` – Verify B402 Payment V2
- `POST /api/v2/b402/settle` – Settle B402 Payment V2
- `POST /api/v1/b402/supported` – Get B402 Supported Configurations V1
- `POST /api/v1/b402/verify` – Verify B402 Payment V1
- `POST /api/v1/b402/settle` – Settle B402 Payment V1
- `GET /api/v1/dex/market/wss/auth/token` – Get WebSocket Auth Token

Binance Web3 WebSocket Streams (1.0.0)

Real-time on-chain data streaming over WebSocket for the Binance Web3 API platform.

- `POST /w3w@onchainos@pub@price@{chainId}@{contractAddress}` – Price Stream
- `POST /w3w@onchainos@pub@tx-data@{chainId}@{contractAddress}` – Market Stats Stream
- `POST /w3w@onchainos@pub@tx@{chainId}@{contractAddress}` – Real-Time Trades Stream
- `POST /w3w@onchainos@pub@candles@{bar}@{chainId}@{contractAddress}` – Candlestick Stream
